(54) Title: IMPROVEMENTS IN MEDICAL DEVICE PACKAGING

WO 2005/060916 A3

(57) Abstract: Packaging (1) for a medical catheter guide wire or the like includes an elongate tubular body (2) having a bore (3) for reception of the guide wire. The body (2) has integral complementary interengagable male (5) and female (6) formations on an exterior of the body (2). These formations (5, 6) interengage when the body (2) is coiled into a spiral hoop for packing and handling, to neatly and securely hold the body (2) in the hoop shape.

(88) Date of publication of the international search report:

29 September 2005

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
